

EE Resource Directory

Introduction

The Environmental Education Association of Indiana has compiled this directory to assist educators in selecting and accessing resources for environmental education in the classroom. Those who work with adults and non-formal youth groups, such as scouts and 4-H, may also find these resources useful in planning activities for meetings, workshops, camp, and other occasions.

The directory is organized into two main sections, those organizations that serve the entire state and those that serve a limited area, such as a county or region. Within the two main sections, you will find public agencies, including federal, state, county, and city departments, and private organizations, such as soil and water conservation districts, conservation organizations, and individuals who are available to share music, stories, or songs.

If you have corrections or additions to this list, please contact Cathy Meyer at Monroe County Parks and Recreation, 119 West Seventh Street, Bloomington, IN 47404, 812-349-2805,

How to Get the Most From These Resources

The organizations and people listed here are experts who are willing to share a vast array of knowledge and materials with you. There are a few ways to make the most of your contacts with them. These contacts are intended primarily for use by adults, not for student research projects.

Before contacting anyone, be clear about your educational objectives. Many of the programs are based on state science standards to help you in meeting educational requirements. Will your objectives best be met with classroom activities, activities using the school grounds, or visits to special sites away from school? Do you need activity ideas, supplementary videos, material or equipment to borrow, or a speaker?

What level of understanding should students have after the program? What will they know beforehand and what will you do to follow-up? Many agencies offer preliminary training for teachers using their programs or they may have pre-visit or follow-up activities for you to use.

When contacting a resource person, be specific in your request. Explain your objectives and state exactly what you need. For a presentation or tour, find out how much time is required and what costs are involved. Is a particular setting needed? Who will supply slide projectors or other equipment? Are additional adults needed for supervision or to assist with the program activities? If you are borrowing or requesting materials such as videos or books, find out when these need to be reserved, if there are charges for shipping, and whether they are appropriate for your needs.

Before scheduling a program, find out how payments are to be made and send in purchase orders on time. There are many ways to finance a special program. Ask about PTO funds, Eisenhower grants, discretionary school funds, etc. Will parents help pay? Will you need to raise funds through sales or events? Make transportation arrangements well in advance. Notify parents about special activities in the classroom, so that they can support your efforts at home. Get permission slips for all students and record any health concerns. If accessibility or special needs are a concern, check with the speaker or site to see how all students can be included. Be sure children are properly dressed to enjoy an outdoor experience and warn them not to wear good shoes.

To avoid disappointment, allow plenty of time for processing and scheduling your request. The beginning of the semester is not too early to plan presentations for the year. Many speakers have limited schedules that fill up fast. Have alternate dates in mind when you call.

When you visit a site or have a speaker come to your classroom, be present at all times and assist with managing your group. Prepare your students for a speaker by explaining the behavior you expect. If your class is taking a field trip, be sure the students know this is a learning experience and not a "play day". Issue assignments before the trip to help them focus. If there are behavioral problems, these are your responsibility. Try to keep a few troublemakers from disrupting the experiences for those who are interested. Resource people may be experts in their field, but you know the students in your class!

Afterwards, evaluate the program. Did it meet your objectives? Did the students enjoy the experience? Make notes for future reference. Thank you notes are always appreciated. Have your students reflect on their experience and write a letter or draw a picture to send to your presenter. If you borrowed materials, send them back promptly and in good condition, so that others may benefit from using them. If the program was outstanding, tell others about it and perhaps even write to the supervisor of the person who presented for you.

Statewide Resources

Federal Agencies

USDA Natural Resources Conservation Service

6013 Lakeside Blvd.

Indianapolis, IN 46278-2933

317-290-9200

FAX: 317-290-3200

Website: <http://nrcs.usda.gov>

NRCS works closely with the county soil and water conservation districts.

Education resources include: posters, bookmarks, publications on wildlife, soil, wetlands and water, and Backyard Conservation Kits.

US Fish and Wildlife Service

621 South Walker Street

Bloomington, IN 47403

812-334-4261 Ext. 209

FAX: 812-334-4273

Contact: Barb Hosler
