

Connection Tube

- Please form a circle
- All of the things we talked about happen successfully when our camp is cohesive and connected
- Starts with us, the staff team
- We lead by example with a connected team effort
- What are the benefits of connections?
- Why is it important at camp? (for campers, for staff)
- Use tube to show that amazing things can happen when everyone is connected & working effectively as a team
- What happens when anyone breaks the connection?
- When any member of the team is not giving 100%, the connection is gone and our circuit (in this case, our camp) breaks down.
- You are ALL the essential connectors who keep the circuit going at Camp.
- Your connections to each other and all of the campers will keep the energy flowing all summer and create an amazing camp experience for everyone!
